CONTENTS

Special Issue on Long-Range Dependence

Edited by V.V. Anh and C.C. Heyde

Volume 80, Numbers 1/2

Preface v

Statistical estimation and asymptotics

Parameter identification for singular random fields arising in Burgers' turbulence *N.N. Leonenko and W.A. Woyczynski* 1

Convergence of normalized quadratic forms *L. Giraitis and M.S. Taqqu* 15

Semiparametric regression under long-range dependent errors *J.T. Gao and V.V. Anh* 37

Non-parametric estimation of the long-range dependence exponent for Gaussian processes *G. Lang and J.-M. Azaïs* 59

Central limit theorem for the empirical process of a linear sequence with long memory *L. Giraitis and D. Surgailis* 81

Stochastic models

Possible long-range dependence in fractional random fields *V.V. Anh, J.M. Angulo and M.D. Ruiz-Medina* 95

Alternative forms of fractional Brownian motion *D. Marinucci and P.M. Robinson* 111

Stochastic models for fractal processes *V.V. Anh, C.C. Heyde and Q. Tieng* 123

Applications

SEMIFAR forecasts, with applications to foreign exchange rates *J. Beran and D. Ocker* 137

On weak convergence of long-range-dependent traffic processes *R.G. Addie* 155

Self-affine time series: measures of weak and strong persistence *B.D. Malamud and D.L. Turcotte* 173

An example of applying the asymptotic quasi-likelihood to dimension estimation for random spatial patterns *Y.-X. Lin and M. McCabe* 197

Simulation studies

A critical look at Lo's modified *R/S* statistic *V. Teverovsky, M.S. Taqqu and W. Willinger* 211

(contents continued)

Maximum likelihood estimators for ARMA and ARFIMA models: a Monte Carlo study *M.A. Hauser* 229

No-cointegration test based on fractional differencing: Some Monte Carlo results *Y.K. Tse, V.V. Anh and Q. Tieng* 257

Some simulations and applications of forecasting long-memory time-series models *V.A. Reisen and S. Lopes* 269
